

SAFETY PROTOCOLS FOR BM CREW

IF YOU FEEL SICK, PLEASE GET YOUR SHIFT COVERED

The following guidelines are in accordance with government recommendations, and are in place for the safety of our customers and Crew.

If you are experiencing symptoms of Covid-19 (dry cough, fever, difficulty breathing), please stay home. Any Crew experiencing symptoms will be given 2 weeks off.

We provide hand sanitizer at all locations. We encourage all our Crew to sanitize their hands between transactions.

We also welcome our customers to use our hand sanitizer, and ask them to do so before handling any jewelry/product, to ensure the safety of our customers and Crew. If customers do not want to sanitize their hands, we cannot allow them to handle any jewelry/product.

We are issuing all locations with new disinfectant cleaner (the only environmentally friendly hospital grade disinfectant on the market) for use in wiping down all surfaces. Throughout the day, we will be disinfecting regular contact points (display cases, debit machines, and counters).

To comply with government guidelines, it is required that all Crew wear protective masks. They are provided with reusable BodyMods masks.

In accordance with government guidelines, whenever possible, Crew & customers are asked to maintain social distancing standards (2 meters).

We are currently adhering to restricted mall hours, in accordance with Covid-19 guidelines.
